

Community Management of High-dose Radiological Events

Satellite Conference and Live Webcast

Friday, December 10, 2010, 12:00-1:30 p.m. (Central Time)
1:00-2:30 p.m. (Eastern) • 11:00 a.m.-12:30 p.m. (Mountain) • 10:00-11:30 a.m. (Pacific)

PROGRAM OBJECTIVES:

1. Prepare community leaders to identify vulnerabilities and list the tools necessary to create strategies for effective consequence management in the presence of a high-dose radiation event.
2. Describe various skill levels for community workers/teams and define training methods to aid their awareness of and preparation for high-dose event interventions.
3. Name the risk communications needs and actions necessary to facilitate a smooth transition of community members to the consequence management activities during a high-dose event on which their welfare and survival depend.

Requirements for nuclear proliferation and an expanded supply of energy worldwide have created an unprecedented environment in human, scientific, and political evolution. Public health officials are now dealing with a more aggressive international stance on the development of and potential use for nuclear weapons. This broadcast will address the challenges of training personnel, operational modes, and community preparedness that are critical to public health planning in the 21st Century.

FACULTY:

Joseph Contiguglia, MD, MPH & TM, MBA
Clinical Professor of Public Health
Tulane University School of Public Health
and Tropical Medicine
New Orleans, Louisiana
